# How to export Image and Animation

1. When we finished our design, we need export it. Sometimes we need export a picture, sometimes we need export to video, GIF or SWF, sometimes we need the transparent background, sometimes we don't. So, we provide two way to export your design. Click "Export" button.

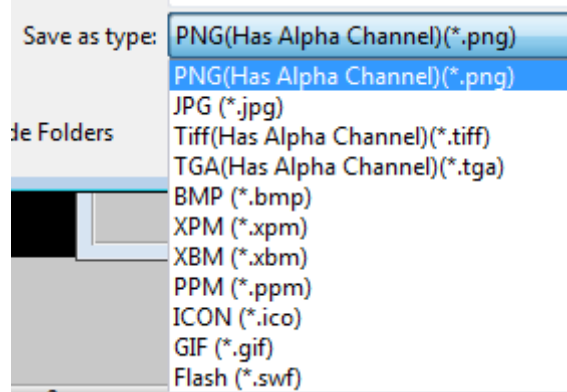

2. First, we select "Export Image". If you want export transparent background, check the "Transparent Background" box. If you want set region, you can set "Save Region" left, top, right and bottom.
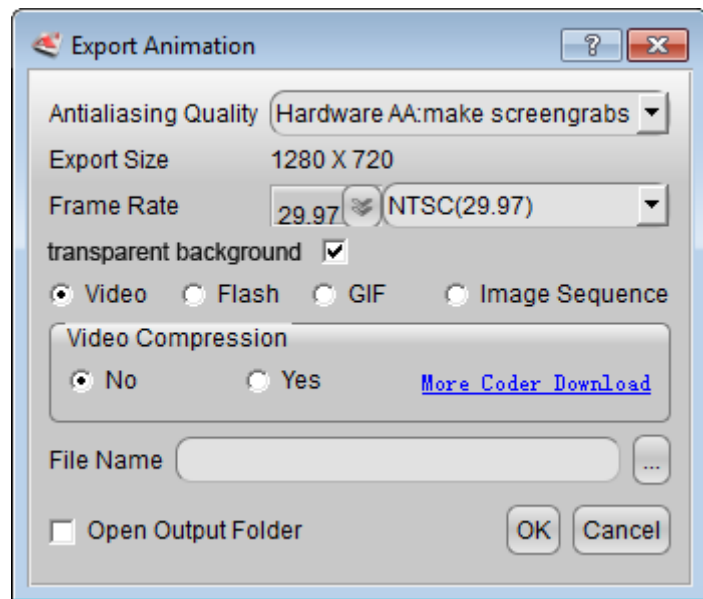

3. "Antialiasing Quality": if your graphic card support FSAA, please Hardware AA, this is better. If your graphic card can't support FSAA, please select Software AA.
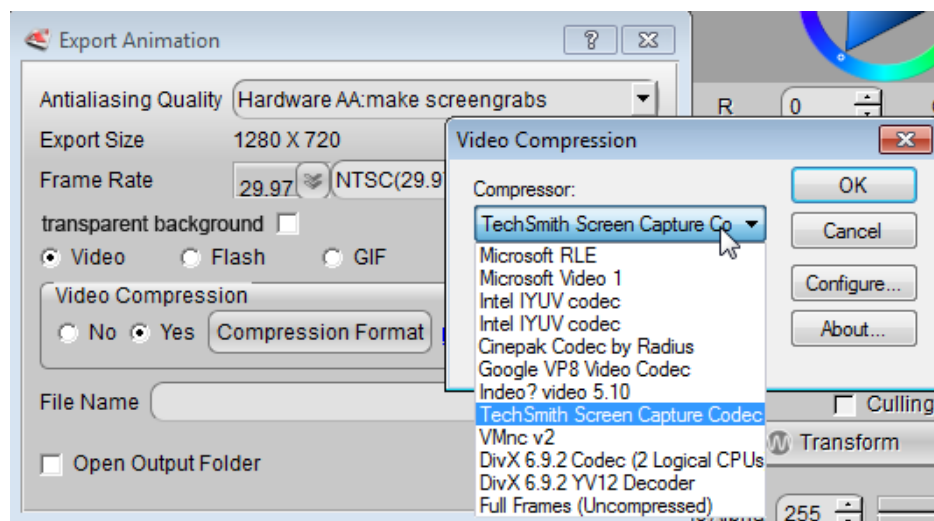

4. We can export format including PNG, JPG, TIFF, TGA, BMP, XPM, XBM, PPM, ICO, GIF etc,.

Save as type: PNG(Has Alpha Channel)(*.png)

PNG(Has Alpha Channel)(*.png)
JPG (*.jpg)
Tiff(Has Alpha Channel)(*.tiff)
TGA(Has Alpha Channel)(*.tga)
BMP (*.bmp)
XPM (*.xpm)
XBM (*.xbm)
PPM (*.ppm)
ICON (*.ico)
GIF (*.gif)
Flash (*.swf)

5. Second, we select "Export Animation". We can get a "Export Animation" dialog. If you want export a video with transparent background, Check "Transparent Background" option and select "No Video Compression".

Export Animation

Antialiasing Quality Hardware AA:make screengrabs
Export Size   1280 X 720
Frame Rate   29.97 NTSC(29.97)
transparent background ☑
  ● Video   ○ Flash   ○ GIF   ○ Image Sequence
  Video Compression
  ● No   ○ Yes   More Coder Download

File Name [   ] [...]
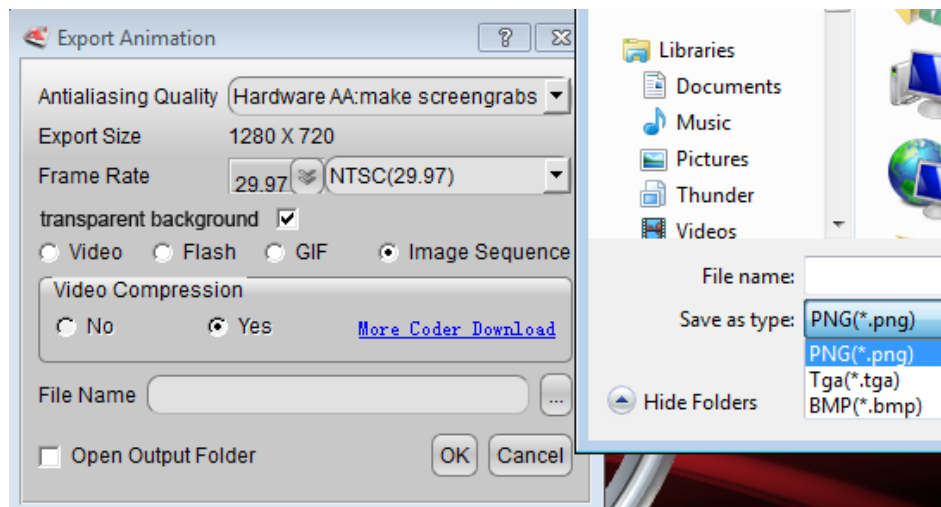

☐ Open Output Folder   OK Cancel

6. If you want export a video with other encode, select "Yes Video Compression", and click "Compression Format" button, select and configure Compressor on the dialog.

Export Animation

Antialiasing Quality Hardware AA:make screengrabs
Export Size   1280 X 720
Frame Rate   29.97 NTSC(29.9
transparent background ☐
  ● Video   ○ Flash   ○ GIF
  Video Compression
  ○ No ● Yes Compression Format
