How to make Texture Animation and Dynamic Background

1. When you create some 3D Logo or Text, but we want make some dynamic for them. Then, we need use Texture Animation function. Let's do it, first, create a 3D text, select a texture and check "Reflection" and "Mirror" box.

2. Click "Animation" button, we got the "Texture Animation" dialog. We can select animation templates or change scroll, rotate and scale value to make texture animation. Click "close" button, we'll get the text bevel texture animation effect.

< Texture Animati	ion 🔹 💽 💌	
Template (None Animation 💌	
Scroll	0.00 🖉 0.00 🖉 R	
Rotate	0.02 K	
Scale (0.00 SR Close	

3. In the background functions, the "SkyBox" and "Dynamic" have the similar function of texture animation. Click the background and select Dynamic. you can choose one of the many dynamic background texture.

4. When we selected the image, we can click the animation button. We can set the image animation on the dialog as same as texture animation.

< Dynamic Ba	ckground Setup		? 🗙		
☐ ✓ Texture1			ОК

Cynamic Background Setup					
Texture1	< Texture Animation	?	хок		
Image (b)	Template (Non	e Animation 💌	Cancel		
	Scroll 0.04	13 0.00 8 R			
	Rotate 0.00	R			
Image	Scale 0.00	0.00 R			
Г		OK Can	cel		
	тапыопп				

5. We set a scroll animation in this guide, Click ok and ok, we can looked this effect, the picture scroll on the background.

6. If you select SkyBox background, you need set 2 pictures at least. And you can set animation like above step. Have fun.

< Skybox	? 💌		
🔽 Sky			ОК
