1. When we make a presentation, maybe we need some in screen or out screen animation. So, in this tutorial, you can learn it. First, we create some shapes and texts, such as this picture.

2. Add a "Slide Show" event and don't need select "Loop" option.

3. Select a picture and add a "Node Animation".

4. Set your in screen animation on the dialog, in screen animation must select "In" option.

✓ Movement ✓ In X 100.00 ¥ 0.00 ≥ Z -120.0 ≥	0.00 🕑 Duration 1.00 🐼
▼ Rotation ▼ In X 180.00 ¥ 90.00 ≥ Z 0.00 ≥	Delay 0.00 S Duration 1.00

 ✓ Transparency ✓ In Alpha 1.00 	Delay 0.00 S Duration 1.00

5. The above steps is regular way to create animation, but we have many "Animation Templates", we can select the picture and drag a animation template to the actions list.

	Animatic In-Slip_L In-Slip_R In-Fade_ In-Flip_D In-Flip_F In-Flip_L In-Flip_L	tight bở In own ar eft	Sound Librar	y]

 Select the pictures and shapes one by one, and make animation with animation templates. In order to these pictures and shapes in the screen at one time, just select trigger at first action. Another things, we can set the start time to little different for better animation.
